What the authors need to do if the article is "Ready to be Edited"?

In this case, the authors must first view the reviewer's comments. To this aim, they can download the file from the upper part of the review form, uploaded by the reviewer, and then apply the necessary amendments based on the reviewers' comments.

Please, respond to all the comments made by the reviewer and make the necessary changes.
Note: The modifications should be specified in red.
After applying these corrections, you can click the "edit" button to open the edit page. On this page, most of the fields are automatically set, and the user must follow the measures listed below:

a. Rewrite the Persian and English abstracts as modified
b. Write the correct names of authors
c. Upload the original file and the file without authors' names

Then, click the confirmation button, and wait for a re-review.
